

TASK-1

Course: Full Stack Web Development
Course Code: 23CM4121
Experiment No: 1
Student Name: Reddy Mohini
Roll No.: A24126552110
Branch: CSM
Section: B
Date:

1. TITLE

College Information Portal Using HTML5

2. AIM

To design and implement a structured College Information Portal using HTML5 elements, forms, multimedia, and semantic tags.

3. OBJECTIVE

- To understand the basics of HTML and HTML5.
- To create a static webpage using headings, paragraphs, lists, tables, and images.
- To implement hyperlinks, forms, and multimedia features.
- To use semantic elements for better structure.
- To apply modern HTML5 input types (email, date, number, color, range).

4. THEORY

HTML (HyperText Markup Language) is the standard language for creating web pages. HTML5 introduces new semantic elements, multimedia support, and modern input types.

- <header>, <section>, <article>, <footer> → Semantic structure.
- <form> → Collects user input.
- <audio> and <video> → Embed multimedia.
- Input types like email, date, color, range → Enhance interactivity.

Flow of webpage rendering: Browser → HTML Parser → DOM Structure → Rendered Page

5. ALGORITHM / PROCEDURE

1. Create a new HTML file.
2. Define the document structure using <!DOCTYPE html>.
3. Add <header> with college name and navigation links.
4. Insert <section> and <article> for content.
5. Use ordered and unordered lists for courses and facilities.
6. Create a table for student details.
7. Insert images for logo and campus.
8. Design a student registration form with multiple input types.
9. Add audio and video elements.
10. Close with a <footer>.
11. Save and run the file in a browser.

6. PROGRAM

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <meta name="viewport" content="width=device-width, initial-scale=1.0">
  <title>College Information Portal</title>
</head>

<body>

  <!-- Header -->
  <header>
    <h1>ABC Engineering College</h1>
    <p>Welcome to the College Information Portal</p>
  </header>

  <hr>
```

```

```

7. CODE EXPLANATION

Code	Explanation

<header>	Defines the header section of the page.
<nav>	Provides navigation links.
,	Ordered and unordered lists.
<table>	Displays student details in tabular format.
<form>	Collects student registration data.
<input type="email">	Validates email input.
<input type="date">	Allows date selection.
<video>	Displays college tour video.
<audio>	Embeds college anthem.
<footer>	Defines the footer section.

8. TEST CASES AND EXECUTION DATA

Test Case	Input	Expected Result	Actual Result	Status
TC-01	Enter valid name, email, password	Form accepts and submits	Works correctly	pass
TC-02	Leave email empty	Browser requires email field	Works correctly	Pass
TC-03	Select date	Date picker appears	Works correctly	Pass
TC-04	Choose color	Color picker appears	Works correctly	Pass
TC-05	Play audio/video	Multimedia plays	Works correctly	Pass

10.RESULT

Thus, a **College Information Portal** was successfully developed using HTML5. The webpage demonstrates structured content, multimedia integration, and modern form controls.
