SECTION: B
COURSE NAME: FULL STACK WEB DEVELOPMENT
CODE: 23CM4121

TITLE OF THE EXPERIMENT

College Information Portal Using HTML5

AIM

To understand and implement the fundamental concepts of HTML and HTML5 by creating a structured College Information Portal using headings, paragraphs, lists, tables, images, hyperlinks, forms, semantic elements, multimedia, and modern HTML5 input types.

DESCRIPTION

This task involves designing a static webpage titled “College Information Portal” using HTML5. The webpage includes basic HTML elements such as headings, paragraphs, text formatting, ordered and unordered lists, hyperlinks, tables, and images. A student registration form is created using different form controls such as text fields, radio buttons, checkboxes, dropdowns, textarea, and submit/reset buttons. HTML5 features including semantic elements, audio, video, and modern input types such as email, date, number, color, and range are also implemented. The task helps students understand how HTML5 is used to create well-structured and interactive web pages.
